## 1.0 Introduction

This quarterly financial report should be read in conjunction with the [Main Estimates](#) and [Supplementary Estimates](#). It has been prepared by Canadian Grain Commission (CGC) management as required by section 65.1 of the [Financial Administration Act](#) and is in the form and manner prescribed by the Treasury Board Accounting Standard 1.3. This quarterly report has not been subject to an external audit or review.

### 1.1 Authority, Mandate and Program Activities

The CGC was established in 1912 and is the federal government department responsible for administering the provisions of the [Canada Grain Act](#) (CGA).

The CGC's mandate as set out in the act is to, "in the interests of the grain producers, establish and maintain standards of quality for Canadian grain and regulate grain handling in Canada, to ensure a dependable commodity for domestic and export markets."

The CGC's vision is "To be a world class, science-based quality assurance provider." The Minister of Agriculture and Agri-Food is responsible for the CGC.

In order to effectively pursue its mandate, the CGC aims to achieve the following strategic outcome: **Canada's grain is safe, reliable and marketable and Canadian grain producers are properly compensated for grain deliveries to licensed grain companies.**

The CGC's Program Alignment Architecture has five programs. The Quality Assurance Program, Quantity Assurance Program, Grain Quality Research Program, and Producer Protection Program each contribute to making progress to the sole strategic outcome. The Internal Services program supports all other programs within the CGC.

Further details on the CGC's authority, mandate, and program activities may be found in the [Report on Plans and Priorities](#) and the [Main Estimates](#).

### 1.2 Basis of Presentation

This quarterly report has been prepared by management using an expenditure basis of accounting (modified cash) and a special purpose financial reporting framework designed to meet financial information needs with respect to the use of spending authorities. The accompanying [Statement of Budgetary Authorities](#) compares the department's spending authorities granted by Parliament to those used by the department. Information in the Statement of Authorities is consistent with that in the [Main Estimates](#) and [Supplementary Estimates](#).

The authority of Parliament is required before moneys can be spent by the Government. Approvals are given in the form of annually approved limits through [Appropriations Acts](#) or through legislation in the form of statutory spending for specific purposes.

---

As part of the Parliamentary business of supply, the Main Estimates must be tabled in Parliament on or before March 1 preceding the new fiscal year.

The CGC uses the full accrual method of accounting to prepare and present its annual departmental financial statements included in the [Departmental Performance Reports](#). However, the spending authorities voted by Parliament are on an expenditure basis (modified cash) of accounting.

### 1.3 CGC Financial Structure

The CGC funding structure is based on budgetary authorities that are comprised of both statutory and voted (non-statutory) authorities. The statutory authorities include employee benefit plan authority for appropriation-funded personnel costs and CGC revolving fund authority, which allows the CGC to re-spend fees that it has collected. The voted authority is Vote 1 – Program Expenditures, which includes annual appropriation authority and any one time ad hoc appropriation authority for the fiscal year.

A revolving fund was set up for the CGC in 1995 with the expectation that the CGC would be largely self-funded through fees for service. Prior to August 1, 2013, CGC user fees had not increased since 1991 despite continually increasing operating costs. As a result, overall cost recovery had fallen from approximately 90 percent in the early 1990s to between 50 and 60 percent. The CGC's falling cost recovery level caused the CGC to rely on ad hoc government appropriation from 1999 to 2014 to fund operations on an annual basis.

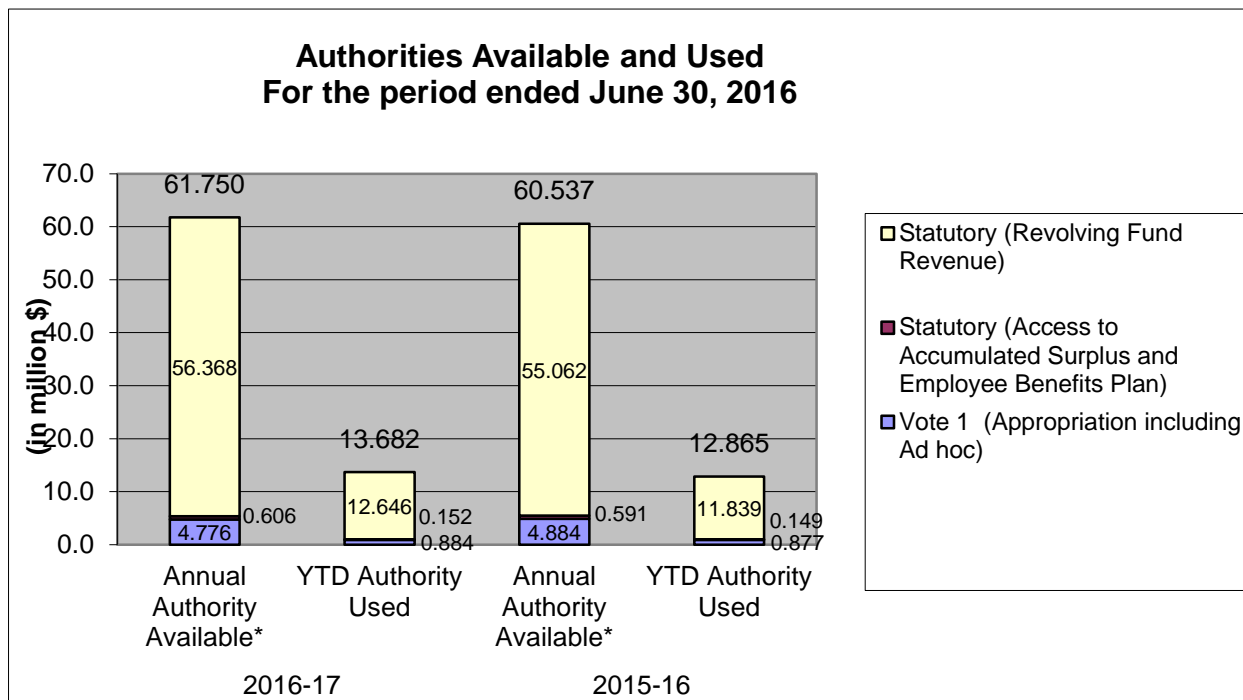

In fall 2012, the CGC initiated a process to modernize user fees to align with amendments to the CGA introduced in Parliament as part of [Bill C-45](#). Bill C-45 received Royal Assent on December 14, 2012. Amended legislation and updated user fees came into force concurrently on August 1, 2013. These changes eliminated the need for annual ad hoc funding going forward.

Planned spending for fiscal year 2016-17 is based on operations under an amended CGA and updated user fees. The CGC plans to recover approximately 91 percent of its costs through user fees. User fees will increase based on inflation as published in November 2012 in the CGC's User Fee Consultation and pre-proposal notification. Planned FTEs are 404 during fiscal year 2016-17.

During 2015-16, the CGC commenced a review of the user fees structure as part of the organizations five year user fees review cycle. The review will ensure that user fees accurately reflect the costs of providing services and reflect updated grain volume projections and the uncertainty associated with such projections. User fees consultations are planned during 2016-17. Updated user fees are expected to be in place by April 1, 2018.

## 2.0 Highlights of Fiscal Year to Date

This section highlights any significant items that affected the year-to-date results and/or contributed to the net change in resources available for the year and actual expenditures. It should be read in conjunction with the [Statement of Budgetary Authorities](#) and the [Departmental Budgetary Expenditures by Standard Object](#), which can be found at the end of this report.

\* Authority available based on amounts approved through the Estimates process. Amounts detailed in Statement of Authorities.

### 2.1 Authority Available Analysis

As reflected in the [Statement of Budgetary Authorities](#), the department's total authority available for use (net of Revolving Fund revenue) in the fiscal year as at June 30, 2016 is \$5.382 million, as compared to \$5.475 million as at June 30, 2015. The authorities available between the fiscal years are consistent.

With the implementation of revised user fees to support its sustainable funding model, the CGC forecasts an increase of \$1.306 million in its revolving fund gross revenues authorities due to inflation adjustments for user fees. This increase does not affect the change in the CGC budgetary authorities.

### 2.2 Authority Used Analysis

As reflected in the [Departmental Budgetary Expenditures by Standard Object](#), the department's total budgetary authority used in the quarter ended June 30, 2016 is

---

(\$6.904 million), as compared to (\$2.510 million) as at the quarter ended June 30, 2015. The decrease of \$4.394 million in total budgetary authority used can be attributed to:

1. the overall increase of \$5.211 million in revenues collected in the quarter ended June 30, 2016 primarily due to an increase in accounts receivable as at the end of period 12 as compared to the previous year; and
2. the overall increase of \$0.817 million in expenditures is as a result of the following significant variances:
  - a. Professional and special services increased by \$0.644 million as compared to the same quarter last year due to the costs associated with the implementation of the SAP financial system. These costs should have been recorded paid against the payable at year end account. The correction will be reflected in the Quarter 2 report;
  - b. Rental costs increased by \$0.233 million as compared to the same quarter last year due to the timing of software license purchases; and
  - c. Acquisition of machinery and equipment decreased by \$0.284 million as compared to the same period last year primarily due WIFI equipment purchased in 2015-16.

As reflected in both the Statement of Budgetary Authorities and the Departmental Budgetary Expenditures by Standard Object, overall expenditures, with consideration to the above changes, are consistent between fiscal periods.

---

## 3.0 Risks and Uncertainties

The CGC receives funding through both voted appropriations and fees related to the handling of grain. Service fee revenue is largely based on grain volumes handled — a volume which fluctuates from year to year. The CGC revolving fund is utilized as effectively as possible. The annual budget is also re-profiled throughout the year to deal with shifting needs and priorities, including planning for and accommodating a potential 20 percent swing in projected grain volumes.

In fall 2012, the CGC initiated a process to modernize user fees to align with amendments to the CGA introduced in Parliament as part of Bill C-45. Bill C-45 received Royal Assent on December 14, 2012. Amended legislation and updated user fees came into force concurrently on August 1, 2013. These changes eliminated the need for annual ad hoc funding going forward and created a more stable environment for integrated people and business management. A stable funding environment may reduce overall organizational risk and allow the CGC to continue to successfully deliver its program activities and achieve its strategic outcome.

While updated user fees took effect on August 1, 2013, there continues to be external pressure and corresponding risks related to the CGC's funding structure. This risk was identified in the 2015-16 RPP and was successfully mitigated during the reporting period. For example, the CGC:

- Commenced a review of its fee structure to ensure that user fees accurately reflect the costs of providing services and updated grain volume projections, as well as the uncertainty associated with these projections; and
- Worked closely with AAFC and other government departments to prepare for user fees consultations planned during 2016-17 and to ensure the user fees amendment process, as per the User Fees Act, is completed in a timely manner.

---

## 4.0 Significant Changes to Operations, Personnel, and Programs

From fiscal year 2012-13 to fiscal year 2015-16, the CGC transformed itself into a streamlined and financially sustainable organization. This is due to certain activities being eliminated and other activities being adjusted and/or implemented to allow the CGC to continue to achieve its mandate and manage risk. Changes resulted in a reduction in operational spending of \$21.835 million between 2012-13 and 2015-16.

Planned operational spending began to stabilize at approximately \$60.537 million in 2015-16. This includes \$5.475 million from annual appropriation and projected spending of approximately \$55.062 million of revenue earned through user fees as adjusted for inflation. Planned human resource requirements decreased from approximately 731 full time equivalents (FTEs) (as at March 31, 2013) to 404 FTEs by the end of 2015-16.

During the fourth quarter of 2015-16, Jim Smolik assumed the position of Acting Chief Commissioner upon the retirement of Elwin Hermanson. It is expected that a process will be initiated to fill the Chief Commission position this fiscal year. Nathan Gerelus was appointed Director, Industry Services.

Significant changes to operations, personnel and programs are not anticipated in 2016-17.

### Approval by Senior Official
